

**e**vultis<sup>sa</sup>

**Evultis Group** is a private company active in the Healthcare Industry.

**Evultis Group** employs in its controlled companies around 40 people (20 Graduates).

**Evultis Group** is considered as one of the best partners in the human and animal Healthcare Industry. Through the integrated activity of its controlled companies and the worldwide network of partnership and links, Evultis Group can offer a 360° range of services. It gives a fast and concrete answer to all the present and future needs of the Healthcare Industry.

**Evultis SA** has been established in 1976.

The activity of Evultis SA started with the trading of pharmaceutical raw materials, APIs and intermediates, for human and veterinary uses.

The constant development of the company along with the evolution of the markets has brought Evultis SA to grow year after year. It has diversified its marketing approaches to face the changes in the requirements as products and according to the customer's perspective.

Today **Evultis SA** can be considered the best partner. For the small API manufacturing companies, which doesn't have the necessary skills to reach the regulated markets and the best partner. For the Finished Products marketing companies that need rapidity and flexibility in the operation.

### **Offered Services**

- Strategic sourcing of A.P.I.s and intermediates
- Study and development of formulation in bulk according to customer request.

## A FEW WORDS ABOUT OUR SYSTER COMPANY FRIULCHEM

FC, belonging to the Swiss Group Evultis SA based in Lugano, was established by the Mazzola family in 1996 in the Italian region of Friuli Venezia Giulia.

**Fully compliant with the EU cGMP**, FC was created for performing **contract manufacturing activities in the human and veterinary pharmaceutical field** (blending, micronization and granulation of chemical and pharmaceutical products).

During the years, FC has incremented its field of action adding to these types of production the **self-development of veterinary drug products and feed for animals**, thanks to the strengthening of the internal R&D laboratory.
